In Eldritch Hunter, you must defeat the sinister minions of the Dark Wanderer by slicing them into bite-sized pieces. The game is 3D and features a level-based design, so you'll be switching between sky, ground and across small platforms. Your main goal is to slice the enemies into smaller parts to kill them. Move the character with Arrow Keys, jump with W, shoot with Left Click, and slice the enemy with Right Click by pressing A. Slice an enemy to gain a new life and the ability to switch weapons with the key combination F11 or Ctrl+Enter. Control the character with the mouse wheel or with Joystick, instead of the keyboard. Game Difficulty: The game is quite easy, but it was tuned to match the players skill level, so some players may struggle with certain parts. Characters: A new companion joins the game: an alien girl called Amalia, who you can transform into with the right weapon. Players who have played the game will get the chance to play as the old character, as well as discover new weapons, enemies and items that were not available in the first run. Wiki: Blog: Links: Blog: My channel: YouTube: Facebook: Rumble: Twitter: Youtube: Shoot the Men with a Machine Gun is a simple point and click shooter with simple mechanics. There's only two weapons you can use, and the level design is so tight, you're only going to be able to have the best performance at 15-20fps depending on your settings. Controls are set to Default Mouse, Tilt-Screen, or with a Joystick. En

At Stanford University, designers, engineers, and patients are pioneering the fields of deep brain stimulation, anti-anxiety medication, and virtual reality based medical procedures. Their goal is to develop innovative methods and tools to aid in the treatment of various mental disorders and diseases. WiseMind is the first product they created that utilizes VR to help the patients become less symptomatic by resetting their brains for better wellness. WiseMind VR offers a series of guided exercises that teach the brain to relax and counteract anxiety. How does this work? The brain is hardwired for "fight or flight" response which creates negative emotions like fear, anger, and anxiety. Our new virtual reality based treatment aims to change this wiring, resetting the brain for better wellness. The Stanford team searched through thousands of online videos and the brainwave data they collected was then utilized in the creation of over 50 wellness activities. Each activity's targets and experience are unique and cater to the users' needs. The Stanford team also created more than 100 guided exercises that fit patients' criteria for regular help. #1 Rated app in 150 categories. Cannon Canines Crack

Ok, first off... at the moment the game is only two third of the way through development, but I do find it absolutely amazing how much of a masterpiece the game looks like. I am yet to see a game with so much detail, and the planet system looks so much like the game Super Mario Galaxy 2 I was amazed. The game looks beautiful, so beautiful, but this has more to do with the graphics, than it does the gameplay. But the graphics are beautiful and only make the game look more amazing. The gameplay looks like some sci-fi version of modern Civilization, with a whole new set of classes and technology. Each class has different units, ranging from flying combatant units to archery and tank units. Each class has 2 abilities and one can be built up to 2 in any class. Weapons are somewhat similar to space gun emplacements from Aliens or the weapons from Firefly, but they can be mounted on different classes units. The Tech Tree is also very intriguing with a complete upgrade system, as well as a research system, along with the normal warfare system. Another feature that I noticed was that your planet can have up to 4 technologies that can be researched and built into your base. If your planet has any type of electricity, you can produce a sub-station that can produce or use energy units, making it easier to build buildings. The game also looks at a TON of different factions and their own individual story line. Every planet has its own little backstory that is given and the worlds can also be built on these planets to create colonies. I am currently in my second playthrough and am loving it so far. I find it very interesting how the different species use their planet, while also developing their planet. It has to be said, it can also be buggy and has crash bugs when using some games exclusive features. I have only encountered a couple of crashes, but nothing serious, and this was only when trying to fly units with tanks or other vehicles. As I said, this is only on the second playthrough, so I will update this review later on with more information on this game, as I want to know the majority of the story line and features of this game first. Another great feature that is being included with this game, is all-new 4X/Horde/RTS hybrid gameplay, where you will need to form alliances with other planets in the game to conquer others and to build your own universe. The planets can
